

- 1 Every project has a dedicated team
- 2 Each team has a clear and aligned task and problem definition.
- 3 Each team tries to understand their users and their context.
- 4 Each team finds suitable and scalable solutions for their problem.
- 5 Each team works with metrics that contribute to the company's goals.
- 6 Each team is responsible for quality, risks, operating models, security and accessibility.
- 7 Each team tests and publishes its work frequently, continuously and with low effort.
- 8 Each team defines its roles, rules, and rituals and adjusts them for their circumstances.
- 9 Each team reuses existing patterns and components.
- 10 Each team works transparently and coherently internally and externally.
- 11 Each team understands the motivations and needs of their project partners.
- 12 Each team works with its project partners in a participatory manner and continuously discusses the project's current status.
